

# FLIRTING 101

You've worked up the nerve to send the first text - here's what every girl needs to know:

- RULE #1** End your texts with a question so he has to write back and the conversation keeps going back and forth.
- RULE #2** Leave time between messages. You don't want him thinking you're staring at your phone waiting in desperation.
- RULE #3** Top up your credit. It'll be a total text-o-drama if you run out and he thinks you've ditched him!
- RULE #4** Don't send "risqué" pics of yourself. It's way too dicey and you don't know who else's phone they'll end up on.
- RULE #5** A thousand kisses at the end of a text is laying it on too thick - a couple is fine.
